Report 78B-HEqcFKYW

Act 843 screening report

14
out of 100

Screening result · demo site

At risk

Adwoa's Kitchen Catering | Demo (deliberately non-compliant)

`http://adwoas-kitchen.demo/` · Scanned 28 Oct 2026, 20:39

8 to fix now **5** to check **0** passed 13 checks in total

Automated first-pass screening, not legal advice. Accolm Check reads only what any visitor can see on the page and, where linked, its privacy page. It cannot see how data is stored, who can access it, or whether the business is on the Data Protection Register. A good score does not mean the site complies with Act 843; a low score shows where to look first.

What this page asks people for

Name
Phone / WhatsApp number
Email address
Ghana Card / national ID
Date of birth
Home or digital address
Special personal data (religion, health, ethnicity, politics)
Mobile money number

Sensitive Special personal data (s.37)

Third-party trackers seen: **Google Analytics / gtag, Meta (Facebook) Pixel**

The eight principles of section 17

(a)	Accountability	Fix now
(b)	Lawfulness of processing	Check
(c)	Specification of purpose	Fix now
(d)	Compatibility of further processing with purpose of collection	Fix now
(e)	Quality of information	Check
(f)	Openness	Fix now
(g)	Data security safeguards	Fix now
(h)	Data subject participation	Fix now

Findings and fixes

Most urgent first. Each check is tied to a section of Act 843.

Fix now · Data security safeguards · s.28 (security measures)

Page is served over HTTPS

The page is not encrypted. Anything typed into it, such as names and phone numbers, can be read or changed on the way to the server.

What we found

```
Final address: http://adwoas-kitchen.demo/
```

→ How to fix

Install a free TLS certificate (for example from Let's Encrypt or your host) and redirect all http:// traffic to https://.

Fix now · Data security safeguards · s.28 (security measures)

Forms send personal data securely

At least one form sends personal data to an unencrypted http:// address.

What we found

```
quote-form: GET → http://adwoas-kitchen.demo/quote.php
```

→ How to fix

Make every form use method="post" and an https:// action. Then check every field again on the server, because browser checks can be bypassed.

Fix now

Openness · s.17 (privacy principles) · s.23 (data subject to be made aware of purpose) · s.27 (registration of data controller)

A privacy notice is published and linked

Visitors are not told what data is collected, why, who receives it or how to contact the person responsible.

What we found

No link containing "privacy" or "data protection" was found.

→ How to fix

Publish a short privacy notice that says what you collect, why, who receives it, how long you keep it and how people can ask to see or correct it. Link it in the footer and beside every form.

Fix now

Specification of purpose · s.19 (minimality) · s.37 (special personal data)

Only necessary data is collected

Section 19 says personal data may only be processed if it is necessary, relevant and not excessive for the purpose. Extra fields are extra risk if the data leaks. Data about religion, health, ethnicity or politics is special personal data and needs a strong justification.

What we found

quote-form asks for 8 personal fields; quote-form looks like a simple enquiry form but asks for Ghana Card / national ID, Date of birth, Mobile money number; quote-form asks for special personal data (religion)

→ How to fix

For each field ask: "What breaks if we remove this?" Remove fields you cannot justify, make others optional, and never ask for Ghana Card or date of birth in a contact form.

Fix now

Compatibility of further processing with purpose of collection · s.40 (direct marketing)

Marketing is a separate, unticked choice

Using contact details for marketing is a new purpose. A pre-ticked box means people are signed up without choosing it.

What we found

"Send me offers and promotions by SMS" (pre-ticked)

→ How to fix

Leave marketing boxes unticked and separate from any consent needed for the main service.

Fix now Accountability · s.27 (registration of data controller)

The business says who it is and how to reach it

Section 27(2) expects people to know the name and address of whoever is collecting their data, so they know who is accountable.

What we found

Email: no, phone: no, physical or digital address: no.

→ How to fix

Show the registered business name, a physical or GhanaPost digital address, an email address and a phone number in the footer or privacy notice.

Fix now

Data subject participation · s.32 (access to personal information) · s.33 (correction of personal data)

People are told how to see, correct or delete their data

People have the right to ask what data you hold about them and to have it corrected or deleted.

What we found

No privacy notice to check.

→ How to fix

Add a "Your rights" section: how to request a copy, a correction or deletion, and who to email.

Fix now Data security safeguards · s.28 (security measures)

Browser security headers are set

These headers tell browsers to always use HTTPS, block injected scripts and stop the page being framed by another site to trick users.

What we found

Strict-Transport-Security: missing; Content-Security-Policy: missing; X-Frame-Options or frame-ancestors: missing; X-Content-Type-Options: missing

→ How to fix

Ask your host or add to your server config: Strict-Transport-Security, a Content-Security-Policy, X-Frame-Options: DENY (or CSP frame-ancestors) and X-Content-Type-Options: nosniff.

◆ Check Specification of purpose · s.23 (data subject to be made aware of purpose)

Forms say why the data is needed

People should know why you are asking for their details at the moment they give them.

What we found

No purpose statement found near: quote-form

→ How to fix

Add one plain sentence above the submit button, for example: "We use your phone number only to confirm your booking."

◆ Check Lawfulness of processing · s.20 (consent, justification and objection)

Consent is asked for, not assumed

No consent checkbox was found. Act 843 allows other lawful reasons (for example a contract), but if you rely on consent, ask for it clearly.

What we found

0 of 1 personal-data form(s) have a consent checkbox.

→ How to fix

Add an unticked checkbox such as "I agree to Business Ltd using these details as described in the privacy notice", linked to the notice.

◆ Check Openness · s.17 (privacy principles)

Tracking tools are disclosed

The page shares visitor activity with third parties (such as Google or Meta) without telling visitors.

What we found

Trackers found: Google Analytics / gtag, Meta (Facebook) Pixel. Cookie notice: not found.

→ How to fix

Add a cookie notice that names the tools you use and lets visitors decline non-essential tracking, and mention them in your privacy notice.

◆ Check

Accountability · s.27 (registration of data controller) · s.46 (Data Protection Register)

Data Protection Commission registration is mentioned

Act 843 requires data controllers to register with the Data Protection Commission. Stating the registration builds trust. This tool cannot check the register itself.

What we found

No mention of the Data Protection Commission was found.

→ How to fix

If you are registered, state it in your privacy notice. If not, register with the Data Protection Commission before collecting personal data.

◆ Check Quality of information · s.26 (quality of information)

Fields help people enter accurate data

Using type="email" and type="tel" helps people enter correct details. This only helps accuracy: the server must still validate every value, because browser checks can be bypassed.

What we found

0 of 2 email/phone fields use the matching input type.

→ How to fix

Use type="email" and type="tel", add a hint such as "e.g. 024 123 4567", and validate the same rules on the server.
